

dlinexsign is pleased to present one of its latest international projects - The American University of Malta (AUM), a private and highly prestigious liberal arts college in the south of Malta. Working closely with our longterm client Sadeen Education Investment Ltd (Sadeen Group) our Export Team helped realise the signs package from brief to concept, through to manufacture and installation..

Key sign types include custom-made Cor-Ten wayfinding totems placed at decision points throughout the campus, internal inauguration signs in 20mm thick Welsh Slate with graphics engraved and gilded in 23.5krt English gold leaf - as well as large scale externally free-standing brushed stainless steel logos built around internally welded frames to stand tall - providing landmark feature points dockside looking onto the waterfront.
