

# Vita Student Head Office, Manchester

## - Case Study

xsign has manufactured and installed a number of external signs at the Head Office of Vita Student.

The sign specification includes bespoke fabricated totems to the entrance of the campus on the main road, and within the central external walkway.

We've also supplied a number of aluminium panel signs fitted to triangular wood posts, stained to match the existing cladding.

Our work with Vita Student extends across numerous student campuses in the UK.

The large, illuminated external sign that features on the main road is eye-catching.

The bespoke fabricated totem, clad with Accoya wood panelling, is fitted together with feature aluminium panels. The wood staining is set to match the cladding that features on the building works.

The fabricated aluminium tray panels are mounted to face, 50mm deep and coated to a paint reference and a gloss finish.

Finally, the face is illuminated with 10mm push through LED modules.

The aluminium panels are coated with a specific colour reference, to a gloss finish.

We've applied digitally printed vinyl graphics to the face of the panels.

The wooden triangular posts use Accoya wood, stained to match the external building cladding.

We've fitted the posts in to the ground to secure fixings and baseplates.
