

# Wellcome Trust - Building 183

## - Case Study

xsign provided a scheme of updated vinyl wraps at 183 Building in London, adjoined with Wellcome Trust.

Rather than a more costly option of replacing an entire suite of signs, 183 Building opted to update the signage and wayfinding scheme with some digitally printed vinyl wraps to the existing signage.

We have provided new vinyl wraps for directory signage, directional signs, freestanding directory signs, suspended signs, lift signs and projecting signs. Additionally, we have provided some cut pictograms on 15mm clear lucite, with a white vinyl application.
