

Interserve HQ - Ingenuity House

- Case Study

dlinexsign Ltd have recently completed a whole suite of signs and graphics at Inter-serve's new flagship Headquarters building near to Birmingham Airport. Externally, there are a range of bespoke illuminated wayfinding totems, along with a feature curved illuminated welcome sign. Internally, we have provided a range of modular signs with a polished concrete finish fixed using our unique jigsaw™ wall rail system.

The new 'Ingenuity House' will allow Inter-serve to consolidate its operations throughout the West Midlands into one 'hub', bringing together 1,200 people currently spread across four offices in the region.
