

# COMMUNITY DOCK

## Royal Wharf Community Dock - Case Study

xsign continue their partnership with on-site contractor, ballymore, at the Royal Wharf development by Pontoon Dock. The new Community Dock features signage and graphics both internally and externally.

Internally, we've developed a digitally printed vinyl graphics scheme to provide branding and wayfinding around the building, using a variety of vibrant colours. We've used large cut vinyl letters to display inspirational quotes and use of vertical space. We also feature a 30mm neon LED sign for a vending machine.

Externally, we've displayed built-up fabricated aluminium letters with face illumination, on a bespoke suspended steel framework. We also feature an illuminated rim and return projecting sign, displaying the Royal Wharf and Community Dock branding.
