# Keele University - Business School

## - Case Study

xsign worked with contractor, Bouygues UK on the signage project at the Smart Innovation Hub at Keele University Business School.

Internally, we have provided a near 5m wide illuminated Reception sign with profile cut lettering and light diffuser for halo illumination. We've also provided 3mm Frosted Lucite lift directory signs on our patented Jigsaw fitting system, door signs and privacy manifestation to glass offices.

Externally, we've manufactured brushed stainless steel cut letters and logos, dress welded, hand-finished and hand-brushed to a 240 grit finish.
