

St Mary's Wavendon C of E Primary School

- Case Study

xsign developed a sign system for St Mary's Wavendon C of E Primary School. We feature some internal door signs, projecting signs, and impressive external signage.

Internally, we have utilised our patented Puzzle signage system to provide door signs across all the classrooms. We use 3mm frosted acrylic and a high polish edge, with high resolution digital print. We also feature 4mm brushed stainless steel pictograms on projecting signs within the corridors to provide easy wayfinding.

Externally, the school features the logo to the outside of the building, using 3mm aluminium cut lettering with automotive grade paint coating.
