

Stowmarket High School

- Case Study

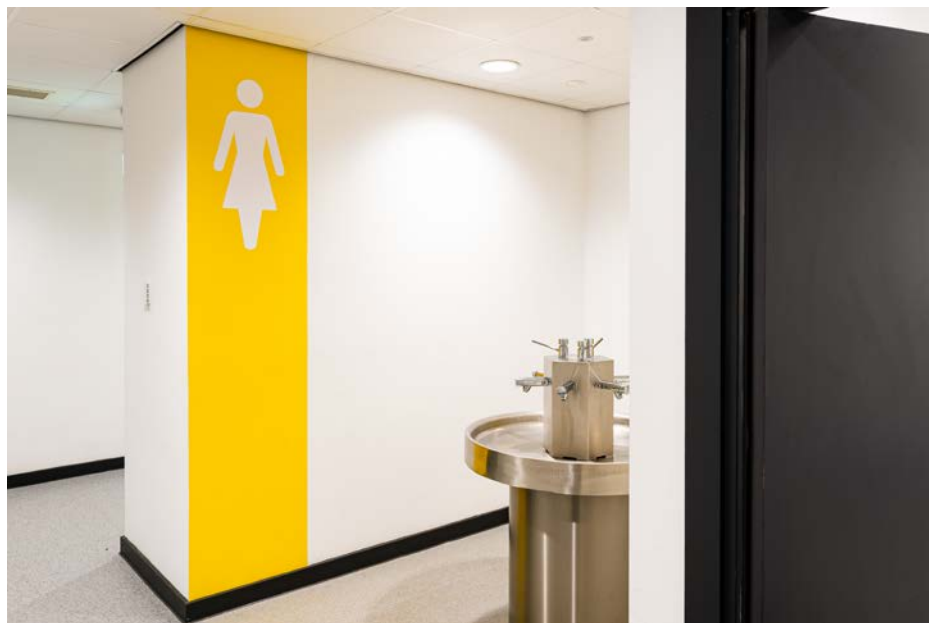

xsign were specified by contractor Wates on the signage project at Stowmarket High School in Suffolk.

We've provided exterior signs and interior signs at the modern learning environment.

Internally, we have provided our patented Jigsaw™ system to aid wayfinding on a 4mm frosted lucite directory board; and a variety of floor level graphics and classroom door signs using our patented Puzzle™ system.

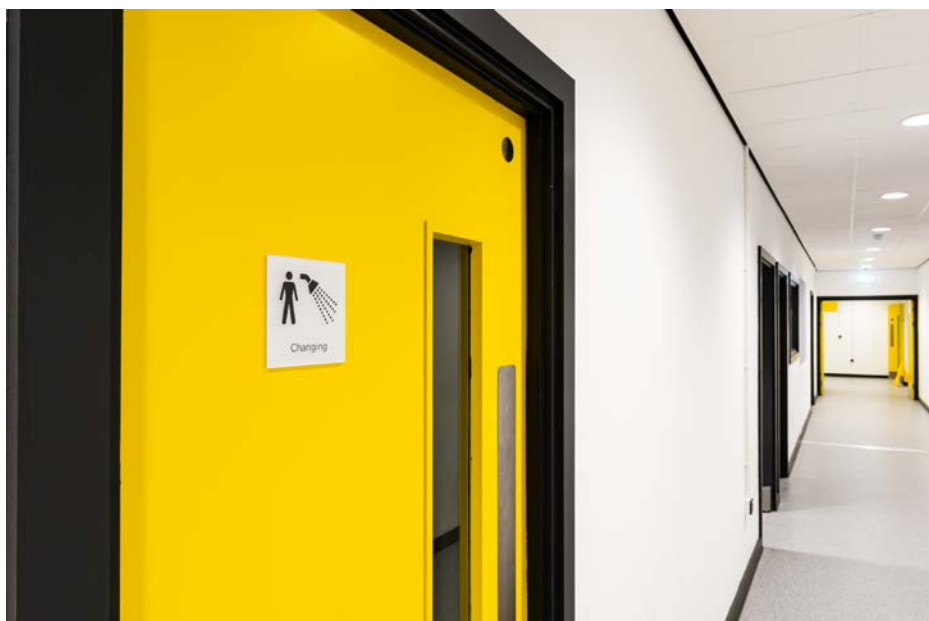

Externally, we have provided a 4mm thick aluminium sign with a ground and smoothed finish a face-coated high grade gloss paint. We've also provided outside lettering welcoming visitors and students alike.

The toilet cores and staircase cores feature a super graphic using high quality 1800dpi digital print using eco-friendly inks. The high tack vinyl allows for use on low energy surfaces such as plaster-

The Visitor, Reception and Student signs to the exterior of the building use a 4mm thick aluminium with a ground and smoothed finished edge detail. We've then face-coated the surface with a high grade paint finish.

Throughout the corridors and walkways we have used a range of frosted lucite door signs, with iconography and a matt texture finish.
