

The Queen Elizabeth Atrium L'atrium Reine Elizabeth

Canadian High Commission

- Case Study

In this project for the Canadian High Commission we created high quality signs that differentiated front of house and back of house, with a robust and practical function.

One unique solution is the frosted glass room naming, fixed by the discreet Jigsaw system. It also features etched and infilled gold leaf and 3D gilt maple leaf motifs.

For the office areas the Folio paper holder signs were selected which allow easy up-dates using Word templates and perforated paper inserts. Matte laquered brass with ceramic text is used for plaques.
