

Cleavelands Medical Centre

- Case Study

xsign were appointed to design, manufacture and install interior and exterior wayfinding signage at Cleavelands Medical Centre in Cheltenham. Working with architect, West Hart Partnership and on-site contractor, Pollards Builders, we delivered a suite of digital print signs, cut letters and graphics.

Internally, we feature 4mm Frosted Lucite with high polished edge detail. The signs also have a white matt face finish and our digital print method ensures ultra-high resolution text. We advised our Puzzle paper-locking door signs to aid changeability of signs. Externally, we feature 4mm thick brushed stainless steel with glass bead blasted edge.
