

# Hafan Cefni Care Home

## - Case Study

We've been appointed on sign projects at three care home sites in North Wales, comprising both exterior signs and internal wayfinding, for contractors Engie and Anwyl Construction. The architect for all three care home sites is BPA Architects.

The internal product featured is a 5mm solid cream acrylic, foil to face finish with UV digital paint, fitted with wall rails.

Externally at Hafan Cefni, we've provided halo-illuminated brushed steel lettering on walls built by the contractor. We also feature brushed stainless steel projecting wall signs.
