

Mayfield Leisure Centre

- Case Study

dlinexsign Ltd recently completed a project to provide a suite of new signs at Mayfield Leisure Centre. Comprising of the Studio, the Gym and the Swimming Pool, the leisure and healthcare facility had a budget-driven project requirement, which we were able to deliver to. We were specified by Wake Architects and appointed by Etec.

We delivered a suite of directional wall-mounted signs built on our Jigsaw™ fixing system. We also displayed ceiling wall mounted signs on suspended steel rods. Externally, the sign is built up non-illuminated aluminum letters, 800mm high with 80mm return.
