

Porthcawl Medical Centre

- Case Study

xsign provided exterior branding and interior wayfinding and graphics for Porthcawl Medical Centre in South Wales. Working with architect, West Hart Partnership and on-site contractor, Andrew Scott Ltd, we delivered a range of digital print signs, cut letters and cut graphics.

Internally, we feature 4mm Frosted Lucite with high polished edge detail. The signs feature a white matt face finish and digitally printed vinyl graphics. We also utilise our Puzzle paper-locking door signs. For the main building directory we feature digitally printed vinyl to smooth substrate. Externally, we feature 4mm thick brushed stainless steel with glass bead blasted edge and applied polish to preserve.
