

University of Northampton - Case Study

dlinexsign Ltd were appointed by Bowmer & Kirkland in 2017 to carry out all of the internal and external signage at The University of Northampton's new 58-acre Waterside Campus.

The £330 million campus will be home to 14,000 students and 2,000 staff when it opens in September 2018.

Externally, the signs are of a built up aluminium construction with night and day illuminated acrylic lenses. Internally, the signs are made up of 8mm gloss black acrylic and 3mm frosted lucite. The text is direct digitally printed in ultra high resolution with 3-D printed braille dots.
