

Wellcome Trust

- Case Study

We originally fitted a range of sign types at the Wellcome Trust, Euston Road in 2008. As part of a rebranding exercise we've helped to update the sign types across the building. We've replaced a number of the interchangeable Folio sign types with modern, frosted acrylic.

The sign package features 5mm white frosted acrylic throughout. We've installed suspended signs in the office environment for easy wayfinding and navigation. New projecting signs around the building feature a bespoke bracket mounting. The front desk features a bespoke cut panel, depicting the logo.
