

# White Pine Coffee Shop

## - Case Study

In this project we provided a range of signs for a coffee shop in Central London. Having featured in the operating manual for the Rathbone Square building guide, White Pine became aware of our signage capabilities.

The logo to the front facade features built up lettering to provide a 3D effect. The shop front banner features white acrylic on black panels and we also feature cut white vinyl graphics to help complete the style of this modern building architecture.
