

Affinity living

Affinity Living, Manchester

- Case Study

xsign continued its long-standing partnership with Vita with the manufacture and installation of the luxury residential signage at Affinity Living in Manchester.

The external signage comprises large cut letters with suitable fixings to the brickwork.

Internally, we have provided a bespoke 3mm rust effect numerals in the hallways and corridors, 3mm thick aluminium iconography signs to provide wayfinding to the gym, toilets and reception areas, and 3mm thick brushed stainless steel with a glass bead blasted edge for the building name signs. All room signs feature rust effect panels with cut out numerals.

External letters fixed to the exterior of the building helps to promote the branding across the Manchester skyline.

3mm thick rust-effect numerals provide floor level wayfinding indication to the residents.

Using 3mm thick aluminium with a ground and smoothed edge and a concrete effect paint finish, we have supplied the iconography signage throughout the building.

The apartment numbers feature 3mm thick rust-effect panels with cut out numerals. The signs are fixed with strong tape.

The building name signs use 3mm thick brushed stainless steel with a glass bead blasted edge to provide a superior finish.

Iconography and cut letters using concrete effect painted aluminium provides internal wayfinding reference.
