

Straits Village, Nottingham

Case Study

xsign provided the internal and external signage package at Straits village in Nottingham.

Internally, we have provided digitally printed profile cut high tack letter graphics with high resolution print and environmentally friendly inks. These signs provide wayfinding for the communal areas and floor levels.

Externally, we have provided 3mm thick coated aluminium signs with a 15% gloss. We've used suitable anchors with spacings to allow the exterior signage some depth.

We've provided digitally printed vinyl graphics applied to the wall surface in the reception area.

We've supplied block vinyl graphics, reverse applied to glass to provide wayfinding through the courtyard.

Digitally printed high tack graphics provide wayfinding to floor levels in the residential blocks.
