

# 4 Wellington Place

## - Case Study

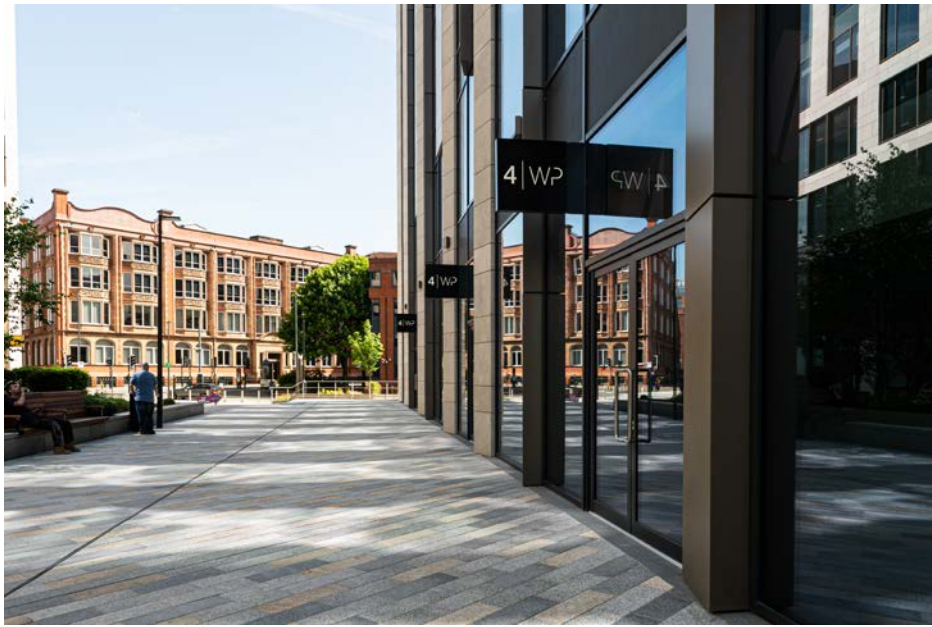

xsign provided an internal and external signage package at 4 Wellington Place in Leeds - a high quality office building in the centre of the city.

Internally, we have provided bespoke stainless steel lettering, built up numerals in the lift lobby area, cut graphics in the stairwell and stainless steel pictograms for the key facilities.

Externally, we have manufactured bespoke, illuminated projecting signs that provide branding for the building.

The high quality signage complements the outstanding architecture and construction.

The projecting signs around the building provide night time illumination and a key wayfinding reference during the day.

Stainless steel pictograms provide a high end finish throughout the building.

In the stairwells we have provided cut graphics to denote the floor level.
