

# Capa College

## - Case Study

xsign supplied the internal and external signage at Capa College in Wakefield, Yorkshire.

The external signage at Capa College includes a bespoke face-illuminated aluminium logo sign with a 100mm deep rim and LED modules. We've also provided an aluminium panel sign with the college logo and address in high tack vinyl print.

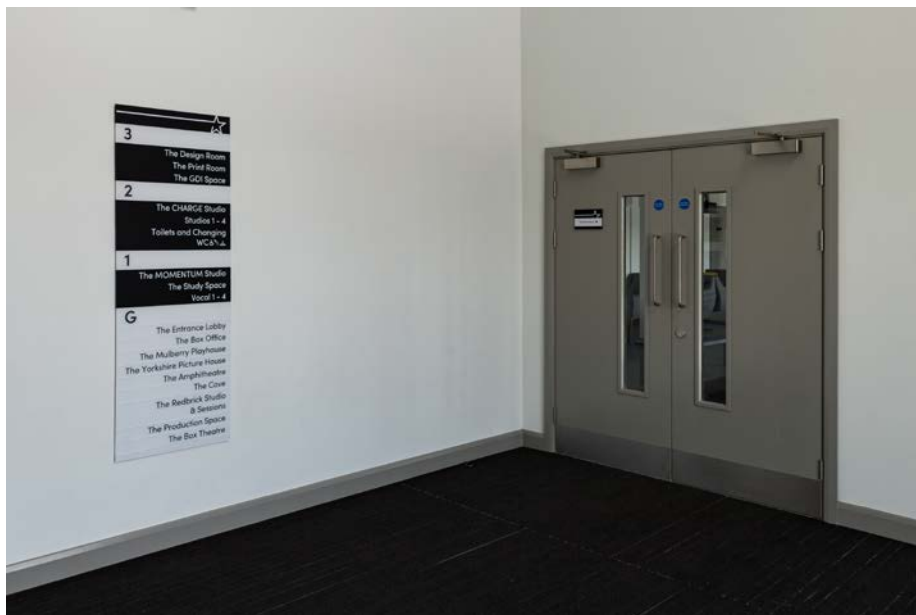

The internal signage comprises general door signage on 4mm thick frosted lucite, a suite of 3mm frosted lucite lockable paper door signs on our patented Puzzle system, several wall-mounted directory signs using our patented Jigsaw product and a suite of projecting signs and pictograms.

The external built up face-illuminated aluminium logo sign features a 100mm deep rim and return. The LED modules are in a cool white to provide night illumination.

In the corridors, we feature a number of projecting signs providing wayfinding along with our patented Jigsaw directory panels.

The Jigsaw directory panel near the entrance provides wayfinding throughout the building. Jigsaw utilises a secret fixing system that enables the easy changing of panels.
