

Gilders Yard, Birmingham

- Case Study

xsign provided the internal and external signage package for FRA at Gilders Yard in Birmingham

The internal signage comprises a fabricated, aluminium projecting sign with double-sided trough illumination in the reception. Additionally, we have provided reverse brass verometal aluminium directory panels, aluminium powder-coated directory panels and profile cut vinyl graphic lettering.

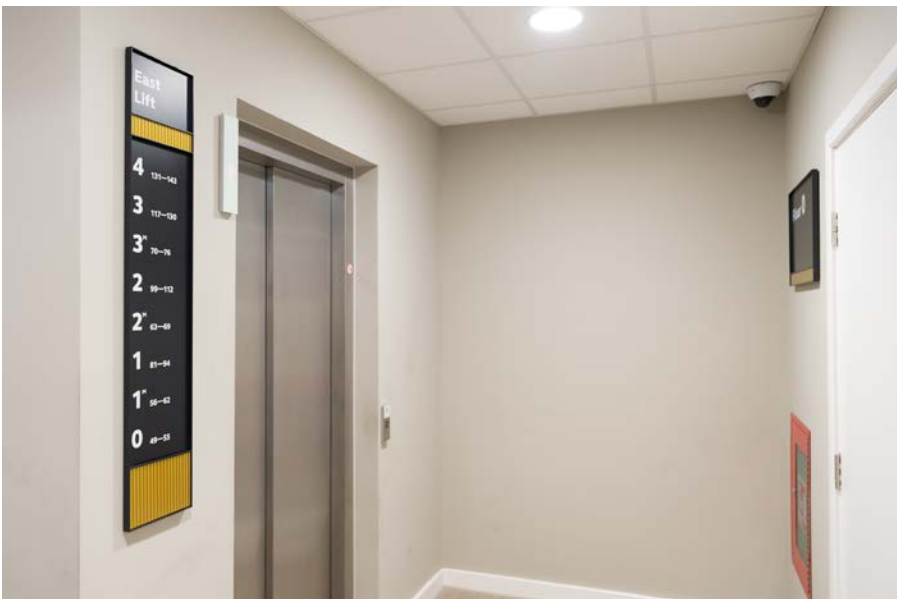

Externally, we have installed 20mm profile cut lettering on the entrance to the building, a bespoke octopus fingerpost sign and a range of aluminium panels throughout the private tenants' car park.

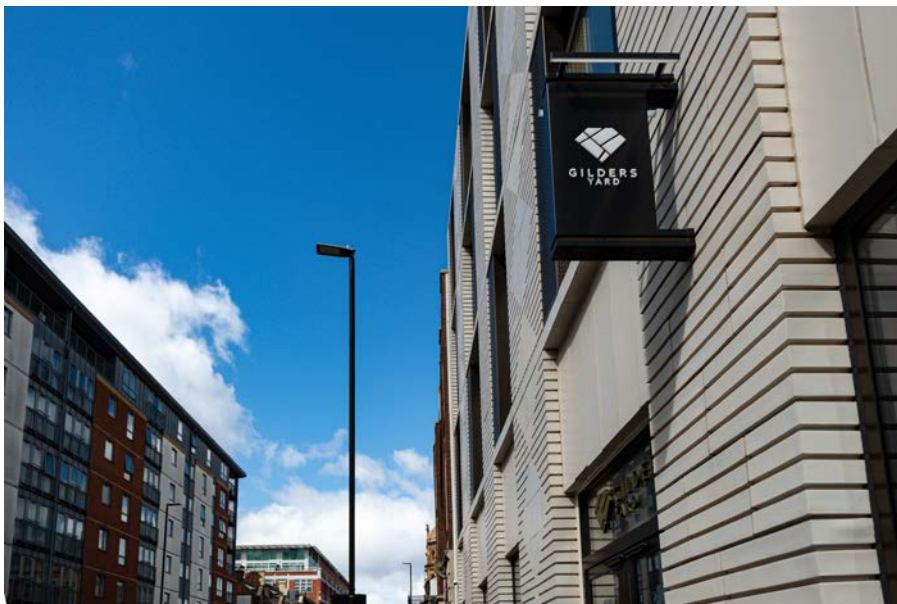

The external entrance to the building features the Gilders Yard branding, manufactured with 20mm thick, solid profile cut lettering. We've prepped the brass finish with a nano overcoat.

The external octopus fingerpost signage features 5mm aluminium coated verometal brass to wrap around finger, with mitre and weld joins, with secure fixings to the fingerpost.

Reeded glass panels with reverse brass detail, an aluminium power coating and an aluminium framework with printed graphics to match the branding RAL colours,

Double-sided illuminated LED projecting sign with brass detail and cut vinyl graphics. Clad with aluminium panels and top/bottom access caps for cabling.

Reeded glass with verometal detail, an aluminium framework with powder coating and UV printed graphics.

Reeded glass with verometal detail and UV printed graphics to face, with spacers and tape fixing to the surface.
