

VITA Warwick

- Case Study

xsign provided the internal and external signage package at the VITA Student residential complex at Warwick.

The external signage scheme comprises a branded high level roof sign with fabricated lettering and rim and return. The lenses are coated with red LED perspex and internal illumination. We have also provided bespoke fabricated, aluminium, illuminated lettering to the entrance of the building and on entrance to the car park we have installed a bespoke fabricated, aluminium totem sign with the VITA branding.

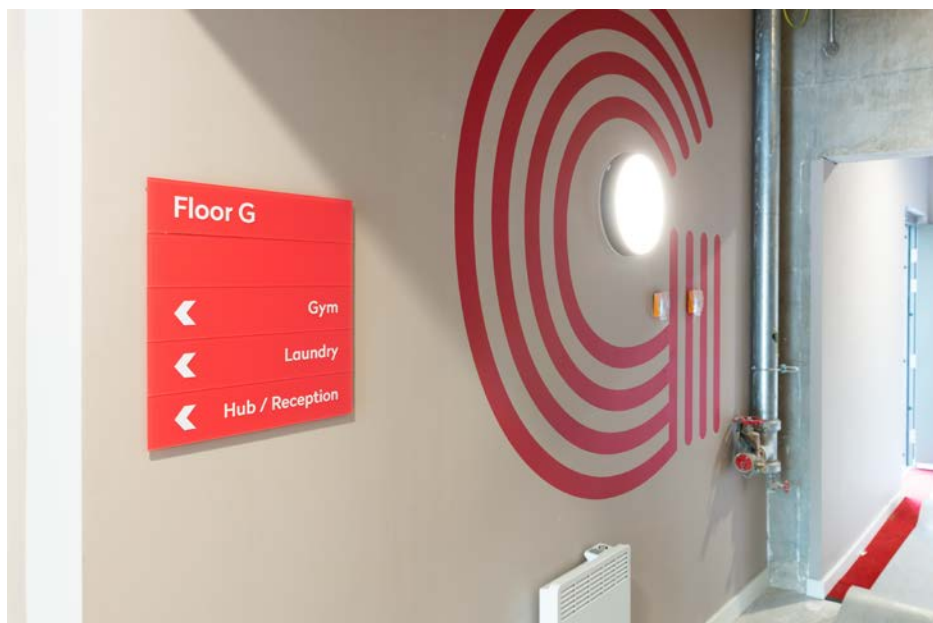

Internally, we have supplied a range of Jigsaw panels, door number signs, directories and a bespoke illuminated reception desk installation that features aluminium panels in coated Pantone, with graphics in 5mm acrylic. The logo is stencil cut and inlaid for an exceptional finish.

The bespoke, fabricated reception desk featured utilises a fabricated, illuminated brand sign with aluminium panels and 5mm acrylic graphics with cool white LED illumination.

In the hallways we have installed built up projecting arrow shaped signs with flat cut graphics. The faces and returns are aluminium coated to match the brand colours. Flat cut graphics are applied to the face and studs and spacing templates supplied for installation.

In the hallways and corridors we have supplied our patented Jigsaw product to make it easy to replace directory panels. We have also supplied low tack vinyl graphics to be applied directly to the wall to indicate the floor level.

External aluminium tray panel signs in the branded VITA colours provide external wayfinding.

Jigsaw is used internally near the lifts and throughout the corridors to provide directional wayfinding. Direct digital print at super high resolution 1800dpi provides excellent legibility.

A bespoke aluminium post and panel sign features in the car park to provide wayfinding.
