

Prestbury Medical Centre

- Case Study

xsign were appointed to provide the wayfinding signage scheme at Prestbury Medical Centre for Med Centres - a design and build specialist for the medical industry.

The external signage comprises flat cut mounted lettering, 250mm in height, manufactured from 3mm coated aluminium, fixed to the brickwork with studs and spacers. In the car park, we have provided aluminium post and panel signs with vinyl graphic lettering applied to provide wayfinding around the practice.

The internal signage includes 3mm thick frosted acrylic cut letters for the Reception desk, 3mm thick cut letters with high polish edge and reverse coated high grade colour finish throughout the building, with our patented Jigsaw™ secret fixing system being used throughout the scheme to provide the easy changing of panels.

The wayfinding signage throughout the medical centre includes projecting signs to signify medical rooms with direct digital print applied.

We've featured our patented Puzzle™ panels outside medical rooms that can allow paper inserts for the easy changing of room occupier.

The external post and panel signs use aluminium planks with adhesive vinyls applied and extruded hollow aluminium legs.
