

# Cortland at Colliers Yard

## - Case Study

xsign were appointed by creative signage agency f.r.a. to manufacture and install the internal and external signage scheme for end client, Cortland Build, at Colliers Yard.

Cortland at Colliers Yard is a stunning, high-end, luxury residential apartment building in Manchester, featuring beautifully landscaped terraces and courtyard, golf simulator room, fitness centre with yoga and spin studios.

f.r.a. led the creative design process, creating a stunning visual scheme and our manufacture and installation ensures the visual concept is realised. The signage beautifully complements the outstanding architecture throughout the shared living spaces. We've used a stunning mix of brass and aluminium signage to provide a scheme befitting of the environment.

Illuminated tray signs with brass cladding provide luxury wayfinding to key facilities throughout.

In the hallways we have fitted 3mm aluminium base panels coated with dark green colour with a brass frame.

The communal living spaces feature 3mm thick brass frames with illuminated internal lettering.

In the communal spaces, we have provided gold-leaf effect signage fitted to glass to provide wayfinding to shared spaces.

Aluminium base panels with brass frames feature throughout the living spaces to complement a high end finish.

Brass frames and illuminated lettering provide high end wayfinding reference points throughout.
