

Candleriggs, Glasgow

- Case Study

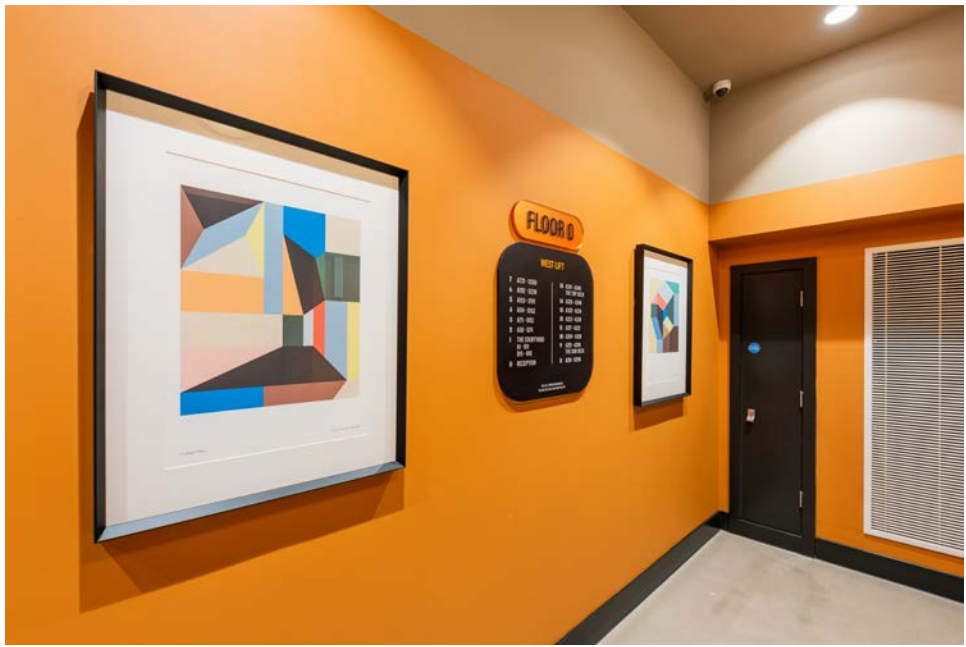

xsign manufactured and installed the signage at Candleriggs, a luxury residential apartment block. The 346 apartment block provides much-needed high quality rental accommodation in Glasgow's Merchant City.

With the design intent by creative agency f.r.a. we were specified to supply a range of spectacular bespoke internal and external signage to provide high quality branding and wayfinding throughout.

The internal scheme features bespoke 3form Chroma Graphite 12mm thick panels. We have also supplied 3D printed prismatic letters, double-sided, illuminated aluminium projecting signs and plot cut vinyl graphics.

Externally, the main entrance features 3D prismatic letters fitted with programmable LEDs. We have also installed a number of aluminium router cut panels.

The lift lobby areas feature the widely used 3form Chroma Graphite panels with a Vellum face finish with UV printed text to match the brand colours.

In the reception area and in the communal spaces, we have fitted face applied plot cut self adhesive vinyl graphics to provide high quality direction and wayfinding.

We have supplied a double-sided aluminium projecting sign with a Verometal coating applied and 3form Chroma Shrimp recessed panels.

We have supplied and fitted projecting signs in the hallway using 3form Chroma Graphite 12mm thick panels with a Vellum face finish and screen printed graphics to match the Pantone reference. We have also fitted an aluminium core layer to allow for a hook invisible fixing.

We have used 3form Chroma Shrimp 12mm panels with a Vellum finish and vinyl art, and black UV print to the face. Panels feature a 2mm edge radius, bonded to 3mm foamex risers and fixed to the substrate.

3D printed prismatic letters and symbols with a Verometal copper finish provide a luxury wayfinding scheme to match the high quality building finish.
